CS60040: Parallel and Distributed Algorithms

All the students are requested to use one of the following servers for running your code. Each of the servers have the following configuration.

- Intel(R) Xeon(R) CPU E5-2697 v2 @ 2.70 GHz

- No. of physical cores : 2 x 12

- 256 GB RAM

The CSE students from the Under-Graduate and Post-Graduate ongoing batches can perform 'ssh' into any of the servers in the same way as you login to the departmental servers using username(your Roll no.) and respective password.
For example, ssh -X Roll_no@server_ip
Non-CS students and newly joined Research Scholars can contact me for their Username and passwords. Please find below the IP for the servers.

1. 10.5.18.101

2. 10.5.18.102

3. 10.5.18.103

4. 10.5.18.104

You are also requested to create a Moodle account and register for the course under the Autumn Semester(15-16) link. Please create a login to moodle if you do not have one by adding a bypass proxy exception for the ip 10.5.30.126.
You have to submit your assignments in Moodle. Please let us know in case you face any issue.
