

A Tutorial

CS60002: Distributed Systems

Pallab Dasgupta
Professor,
Dept. of Computer Sc. & Engg.,
Indian Institute of Technology Kharagpur

1. Compute the spanning tree on the following graph using a wave algorithm with A as the initiator.

2. Adapt the Echo Algorithm to compute the sum over the inputs from the processes.

3. What would be the difference between Chang-Roberts algorithm and the Extinction Algorithm when applied to rings? What effect does this difference have?
