LOGICAL DEDUCTION IN AI

PROPOSITIONAL LOGIC

Partha P Chakrabarti

Indian Institute of Technology Kharagpur

Logic in Ancient Times

First Few Examples Propositional

- If I am the President then I am well-known. I am the President. So I am wellknown
- If I am the President then I am well-known. I am not the President. So I am not well-known. Not wreat
- If Rajat is the President then Rajat is well-known. Rajat is the President. So Rajat is well known.
- If Asha is elected VP then Rajat is chosen as G-Sec and Bharati is chosen as Treasurer. Rajat is not chosen as G-Sec. Therefore Asha is not elected VP.
- If Asha is elected VP then Rajat is chosen as G-Sec and Bharati is chosen as Treasurer. Rajat is chosen as G-Sec. Therefore Asha is elected VP.

Deduction Using Propositional Logic: Steps

- <u>Choice of Boolean Variables a, b, c, d, ... which can take values true or false</u> <u>Boolean Formulae developed</u> using well defined connectors \sim , \land , \lor , \rightarrow , etc, whose meaning (semantics) is given by their truth tables.
- Codification of Sentences of the argument into Boolean Formulae.
- Developing the <u>Deduction Process</u> as obtaining truth of a <u>Combined</u> Formula expressing the complete argument. ✓

<u>Determining the Truth</u> or Validity of the formula and thereby proving or disproving the argument and Analyzing its truth under various Interpretations.

<u>Choice of Boolean Variables</u> a, b, c, d ... which can take values <u>true</u> or <u>false</u>.

Boolean Formulae developed using well defined connectors \sim , \land , \lor , \rightarrow , etc, whose meaning (semantics) is given by their truth tables.

<u>Codification</u> of Sentences of the $\sqrt{}$ argument into Boolean Formulae.

Developing the Deduction Process as obtaining truth of a <u>Combined Formula</u> expressing the complete argument. <u>Determining the Truth or Validity of the</u> formula and thereby proving or

disproving the argument and Analyzing its truth under various Interpretations.

If I am the President then I am well-known. I am the President. So I am well-known **Coding: Variables** a: I am the President ~ b: I am well-known 🗸 Coding the sentences: F1: $a \rightarrow b$ $a \rightarrow b \equiv 7avb$ F2: a 🗸 G: b 🗸 The final formula for deduction: $(F1 \land F2) \rightarrow G$, that is: $((a \rightarrow b) \land a)$

Boolean variables a, b, c, d, ... which can take values <u>true</u> or <u>false</u>.

Boolean formulae developed using well defined connectors \sim , \land , \lor , \rightarrow , etc, whose meaning (semantics) is given by their truth tables.

Codification of sentences of the argument into Boolean Formulae.

Developing the Deduction Process as obtaining truth of a combined formula expressing the complete argument.

Determining the Truth or Validity of the formula and thereby proving or disproving the argument and Analyzing its truth under various interpretations.

Boolean variables a, b, c, d, ... which can take values <u>true</u> or <u>false</u>.

Boolean formulae developed using well defined connectors \sim , \land , \lor , \rightarrow , etc, whose meaning (semantics) is given by their truth tables.

Codification of sentences of the argument into Boolean Formulae.

Developing the Deduction Process as obtaining truth of a combined formula expressing the complete argument.

Determining the Truth or Validity of the formula and thereby proving or disproving the argument and Analyzing its truth under various interpretations.

If I am the President then I am well-known. I am the President. So I am well-

<u>known</u>

Coding: Variables

a: I am the President

b: I am well-known

Coding the sentences:

F1: $a \rightarrow b$

- F2: a
- G: b

The final formula for deduction: $(F1 \land F2) \rightarrow G$, that is: $((a \rightarrow b) \land a) \rightarrow b$

| а | b | $a \rightarrow b$ | $(a \rightarrow b) \land a$ | ((a \rightarrow b) \land a) \rightarrow b |
|---|---|-------------------|-----------------------------|--|
| Т | Т | Т | Т | Т |
| Т | F | F | F | Т |
| F | Т | Т | F | Т |
| F | F | Т | F | Т |

If Rajat is the President then Rajat is wellknown. Rajat is the President. So Rajat is well known **Coding: Variables** a: Rajat is the President b: Rajat is well-known Coding the sentences: F1: $a \rightarrow b \checkmark$ F2: a 🗸 G: b 🗸 The final formula for deduction: (F1 \wedge F2) \rightarrow G, that is: $((a \rightarrow b) \land a) \rightarrow b$ Both formulae are identical

If Asha is elected VP then Rajat is chosen as G-Sec If Asha is elected VP then Rajat is chosen as Gand Bharati is chosen as Treasurer. Rajat is not Sec and Bharati is chosen as Treasurer. Rajat is chosen as G-Sec. Therefore Asha is not elected VP. chosen as G-Sec. Therefore Asha is elected VP. a: Asha is elected VP b: Rajat is chosen G-Sec c: Bharati is chosen Treaswood F2: $(a \rightarrow (b \land c))$ F1: Towth Table FINF2)-> (q 76 will have 8 F2 is true under all interpretations or not. grows. NF2

Methods for Deduction in Propositional Logic

Interpretation of a Formula

Valid, non-valid, Satisfiable, Unsatisfiable

Decidable but NP-Hard

Truth Table Method

Faster Methods for validity checking:-Tree Method

Data Structures: Binary Decision Diagrams

Symbolic Method: Natural Deduction

Soundness and Completeness of a Method

NATURAL DEDUCTION:

Modus Ponens: (a \rightarrow b), a :- therefore b Modus Tollens: $(a \rightarrow b)$, ~b :- therefore ~a Hypothetical Syllogism: (a \rightarrow b), (b \rightarrow c):therefore $(a \rightarrow c)$ \checkmark Disjunctive Syllogism: (a V b), ~a:- therefore b Constructive Dilemma: (a \rightarrow b) \land (c \rightarrow d), (a V c) :- therefore (b V d) Destructive Dilemma: (a \rightarrow b) \land (c \rightarrow d), (~b V ~d) :- therefore (~a V ~c) Simplification: a Λ b:- therefore a \checkmark Conjunction: a, b:- therefore a Λ b \checkmark Addition: a :- therefore a V b Natural Deduction is Sound and Complete

Insufficiency of Propositional Logic

Wherever Mary goes, so does the lamb. Mary goes to school. So the lamb goes to school.

No contractors are dependable. Some engineers are contractors. Therefore some engineers are not dependable.

All dancers are graceful. Ayesha is a student. Ayesha is a dancer. Therefore some student is graceful.

Every passenger is either in first class or second class. Each passenger is in second class if and only if he or she is not wealthy. Some passengers are wealthy. Not all passengers are wealthy. Therefore some passengers are in second class. Thank you
